# EduPulse SMT Legal Counsel Packet

## Purpose

This document is the consolidated entry point for legal counsel reviewing EduPulse SMT for:

1. Business incorporation
2. Intellectual-property ownership and protection
3. Confidentiality structuring
4. Ghana data-protection positioning
5. Platform terms, school contracts, and governance documentation

## Business Name

**EduPulse SMT**

SMT means **Smart School Management Technology**.

## What This Packet Covers

This packet gives counsel a practical overview of:

1. What EduPulse SMT is as a business and software platform
2. How the system operates technically
3. How parent admissions, report-card intelligence, and exam-guidance workflows operate
4. How payment categorization, reconciliation, and historical route metadata work
5. How external KYB provider screening, cryptography, and tamper-evident finance controls work
6. Which system components are likely to be high-value IP or confidential know-how
7. Which technical controls support Ghana data-protection compliance analysis
8. How planned anonymized multi-school benchmarking should be described in contracts and DPC-facing materials

## Recommended Reading Order For Counsel

1. `LEGAL_COUNSEL_DOSSIER.md` Single-file version of the counsel packet for easy forwarding.
2. `LAWYER_DOCUMENT_CHECKLIST.md` Exact document list for incorporation and data-protection work.
3. `LAWYER_COVER_EMAIL.md` Ready-to-send email copy introducing the packet.
4. `LAWYER_EXECUTIVE_BRIEF.md` Shortest high-level overview.
5. `LAWYER_TECHNICAL_SYSTEM_SUMMARY.md` Full technical explanation of the platform, payment categorization controls, historical route compatibility, and cryptography.
6. `IP_ASSET_INVENTORY.md` Main asset inventory for ownership, confidentiality, and protectability review.
7. `GHANA_DATA_PROTECTION_TECHNICAL_BRIEF.md` Technical control mapping for Ghana privacy/compliance review.
8. `FOUNDER_IP_AND_CONFIDENTIALITY_CHECKLIST.md` Founder action checklist for locking down ownership and confidentiality.

9. `CONTRIBUTOR_IP_ASSIGNMENT_TEMPLATE.md` Draft assignment template for contributors, contractors, and collaborators.
10. `CONFIDENTIALITY_NDA_TEMPLATE.md` Draft confidentiality/NDA template for advisors, partners, contractors, or other recipients of confidential information.
11. `compliance/CONSENT_AND_NOTICE_TEMPLATES.md` Draft onboarding and consent wording, including anonymized analytics notice language.
12. `ANONYMIZED_ANALYTICS_ETL_MEMO.md` Technical design memo for the future de-identification and analytics warehouse workflow.

# Recommended Submission Bundles

## Incorporation And IP Bundle

Send counsel:

1. `LAWYER_DOCUMENT_CHECKLIST.md`
2. `LAWYER_EXECUTIVE_BRIEF.md`
3. `IP_ASSET_INVENTORY.md`
4. `FOUNDER_IP_AND_CONFIDENTIALITY_CHECKLIST.md`
5. `CONTRIBUTOR_IP_ASSIGNMENT_TEMPLATE.md`
6. `CONFIDENTIALITY_NDA_TEMPLATE.md`

## Data Protection And Data Processing Bundle

Send counsel:

1. `GHANA_DATA_PROTECTION_TECHNICAL_BRIEF.md`
2. `compliance/PRIVACY_POLICY.md`
3. `compliance/DATA_PROCESSING_AGREEMENT.md`
4. `compliance/DATA_RETENTION_POLICY.md`
5. `compliance/INCIDENT_RESPONSE_PLAN.md`
6. `compliance/INFORMATION_SECURITY_POLICY.md`
7. `compliance/TERMS_OF_SERVICE.md`
8. `compliance/CONSENT_AND_NOTICE_TEMPLATES.md`
9. `docs/operations/internal/ANONYMIZED_ANALYTICS_ETL_MEMO.md`

# Counsel Objectives

The immediate legal objectives supported by this packet are:

1. Incorporate EduPulse SMT under the right legal framing
2. Make ownership of code, workflows, documentation, and operational materials explicit
3. Identify which system elements should be treated as confidential know-how or trade-secret-like assets
4. Make sure privacy, retention, incident, and processor/controller language match the actual technical controls
5. Strengthen school contracts, internal agreements, and partner agreements around ownership and misuse restrictions

# Short Business Description

EduPulse SMT is a multi-tenant SaaS platform for schools in Ghana. It combines academic workflow management, fee and billing oversight, proprietor governance, school subscription logic, tamper-evident finance logging, and selected application-layer encryption for sensitive data.

The system should be viewed legally as more than a generic school-management application. Its value lies significantly in the combination of:

1. Tenant-specific school operation controls
2. Paystack-linked payment-routing and classification logic
3. External KYB automation with fallback/manual exception handling
4. Cryptographic finance integrity controls
5. Role-gated workflow and approval logic
6. Repeatable business operations playbooks

# Key Legal Themes For Counsel

## 1. Intellectual Property

The platform contains protectable authored materials and implementation choices, including source code, operational templates, workflow logic, and brand assets.

## 2. Confidential Know-How

Some of the strongest assets are not just code files, but the business methods encoded in the system, especially payment routing, reconciliation, and governance workflows.

## 3. Data Protection

The platform handles student, guardian, staff, and payment-related data. The technical posture includes role restriction, tenant separation, selected encrypted fields, webhook verification, retention logic, incident planning, and tamper-evident finance records.

The current legal work should also address a planned macro-analytics layer in which identifiable school records are de-identified before being reused for aggregated benchmarking, research-style reporting, and premium customer insights.

## 4. Contract Structuring

Counsel should align incorporation records, IP ownership clauses, confidentiality obligations, school-facing terms, privacy notices, and processor/controller language with the technical reality of the system.

# Main Counsel Questions

Counsel should ideally answer or address these questions:

1. What is the best legal framing for EduPulse SMT as a business entity and software product?
2. Which system elements should be explicitly reserved as IP, confidential information, or trade-secret-like know-how?
3. What contributor, employee, contractor, and partner agreements are needed to ensure ownership remains with EduPulse SMT?

4. How should Ghana data-protection roles be described between EduPulse SMT and each school?
5. What terms should govern customer data ownership, software ownership, audit evidence, anonymized analytics ownership, and misuse restrictions?

## Supporting Repository Evidence

The strongest supporting files in the repository include:

- `backend/routes.py`
- `backend/api/models.py`
- `backend/security/crypto.py`
- `backend/paystack_integration.py`
- `docs/security/AUDIT_INTEGRITY_SYSTEM.md`
- `SECURITY.md`
- `compliance/PRIVACY_POLICY.md`
- `compliance/DATA_RETENTION_POLICY.md`
- `compliance/INCIDENT_RESPONSE_PLAN.md`
- `docs/operations/internal/STANDARD_OPERATING_PROCEDURES.md`

## Recommended Use

Use this file as the top-level packet index whenever legal counsel needs a single starting point.
